10746 E DEAL RD · WILLIAMSBURG, MICHIGAN

Concept pack · v4.6

Clark + Jenny · November 9, 2026 (America/Detroit)

Corrected compass (wrap deck west and north, garage doors west, small deck east). Florida furniture with the Steinway in the living room. 4-person wood-fired sauna in the east back yard. Honest primary-bath refresh. CrossFit gym in the rear barn. Future concept on the east land. Utilities from the 1993 sketch (approximate, not surveyed).

Not a survey, bid, or as-built. No flooring changes in the house. Offer amounts and private finances omitted. Concept visualization only.

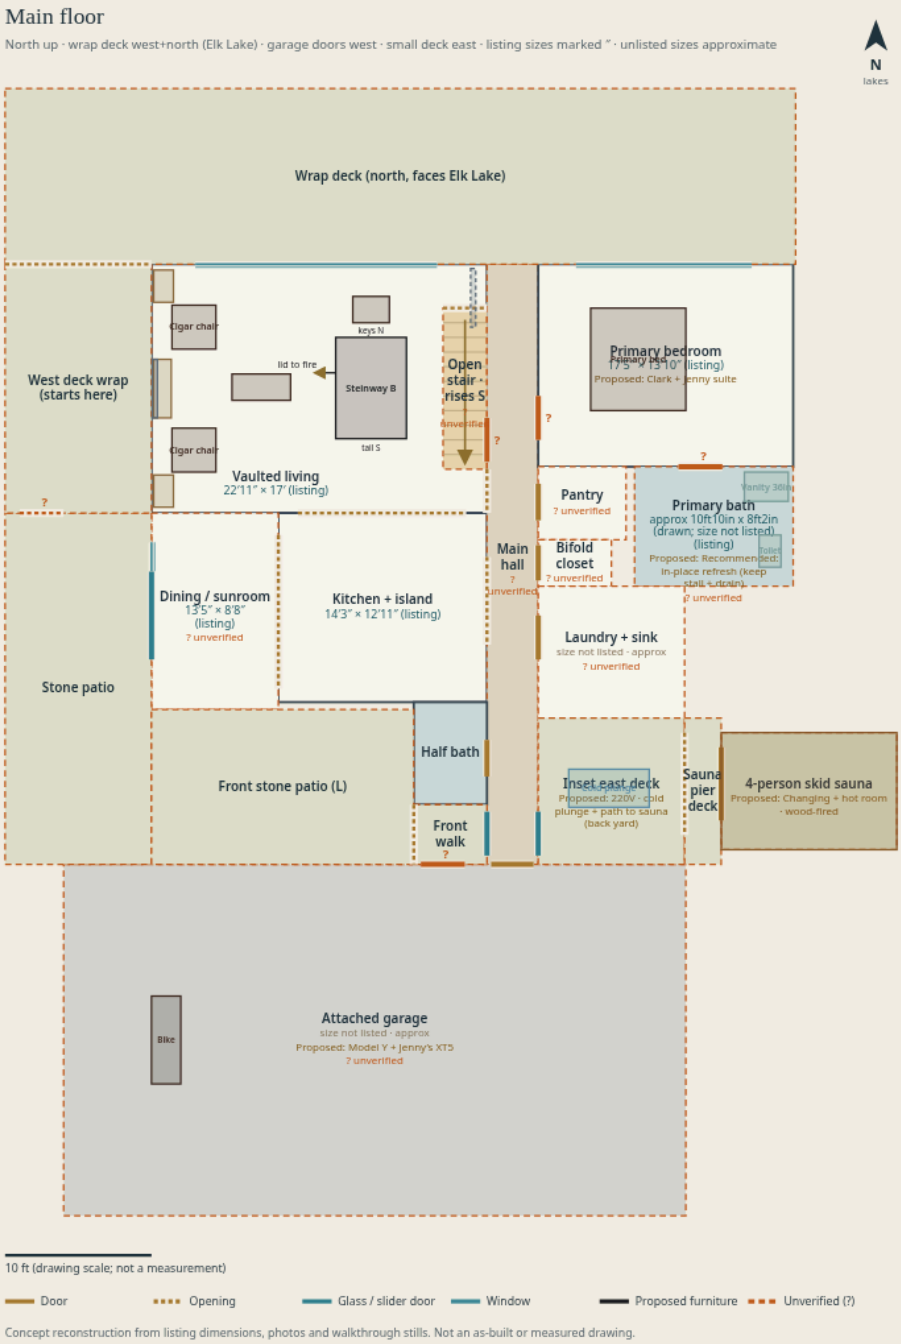
Highlights & anchors

- **Compass (owner, Nov 9):** The large wrap deck starts on the west and wraps north toward Elk Lake (lake views north). Garage doors face west, toward the drive / Deal Rd. The small inset deck is on the east (back yard), enclosed on three sides, open only east. v4.5's 90° rotation was wrong and has been reverted.
- **Main floor:** Primary bedroom east of the living room. Hall runs south from the primary; half bath is the last door on the right before the T. At the T, east to the small deck, west to the front / garage.
- **Upper floor:** Walking up the stairs, the bath door is almost straight ahead, slightly to the right. Clark's east office door is immediately to the left. Jenny is west; middle room and bath have side doors; east and west rooms have end-wall doors.
- **Piano:** Steinway Model B (~6′11″ long, ~4′10″ wide) by the stair, across from the fireplace. Keyboard and bench on the north / window side, tail south, lid opening west toward the fire. It fits, with about 3 ft of bench clearance and a walking path.
- **Sauna:** 4-person ~8×12 wood-fired skid sauna just east of the inset east deck, with the cold plunge on the deck. East grade is a milder cross-slope (the steep drop is north, under the wrap deck).
- **Rear gym barn:** Working size 30×40 ft, 9′6″–10′ clear height (owner walk; width may be 35 ft). Centered Rogue ML-14 (14×6, 9 ft uprights, bars at 7′6″). ¾ in stall mats over the whole floor. Florida wall rack is a side accessory only.
- **Budget:** House / barn-envelope about $42,300–$83,000 (under $100k, no house flooring changes). Gym equipment plus mats are a *separate* line, about $13,500–$25,000 including 6% Michigan tax. Estimates, not bids.
- **Future concept:** A 1,000–1,400 sf cottage-style house on the east land, porch facing north, reached by a spur off the existing driveway. Toggleable in the 3D model. Not a construction plan.
- **Utilities:** 1993 well north of the house, 2,000-gal tank about 22 ft south, 21×50 drain bed beyond it (no-drive / no-build). A future option shows a separate well and septic for an accessory barn bath.

Lake views are distant and elevated (Elk Lake is about 1.5 km or more to the east-northeast), not a shoreline view.

Main floor

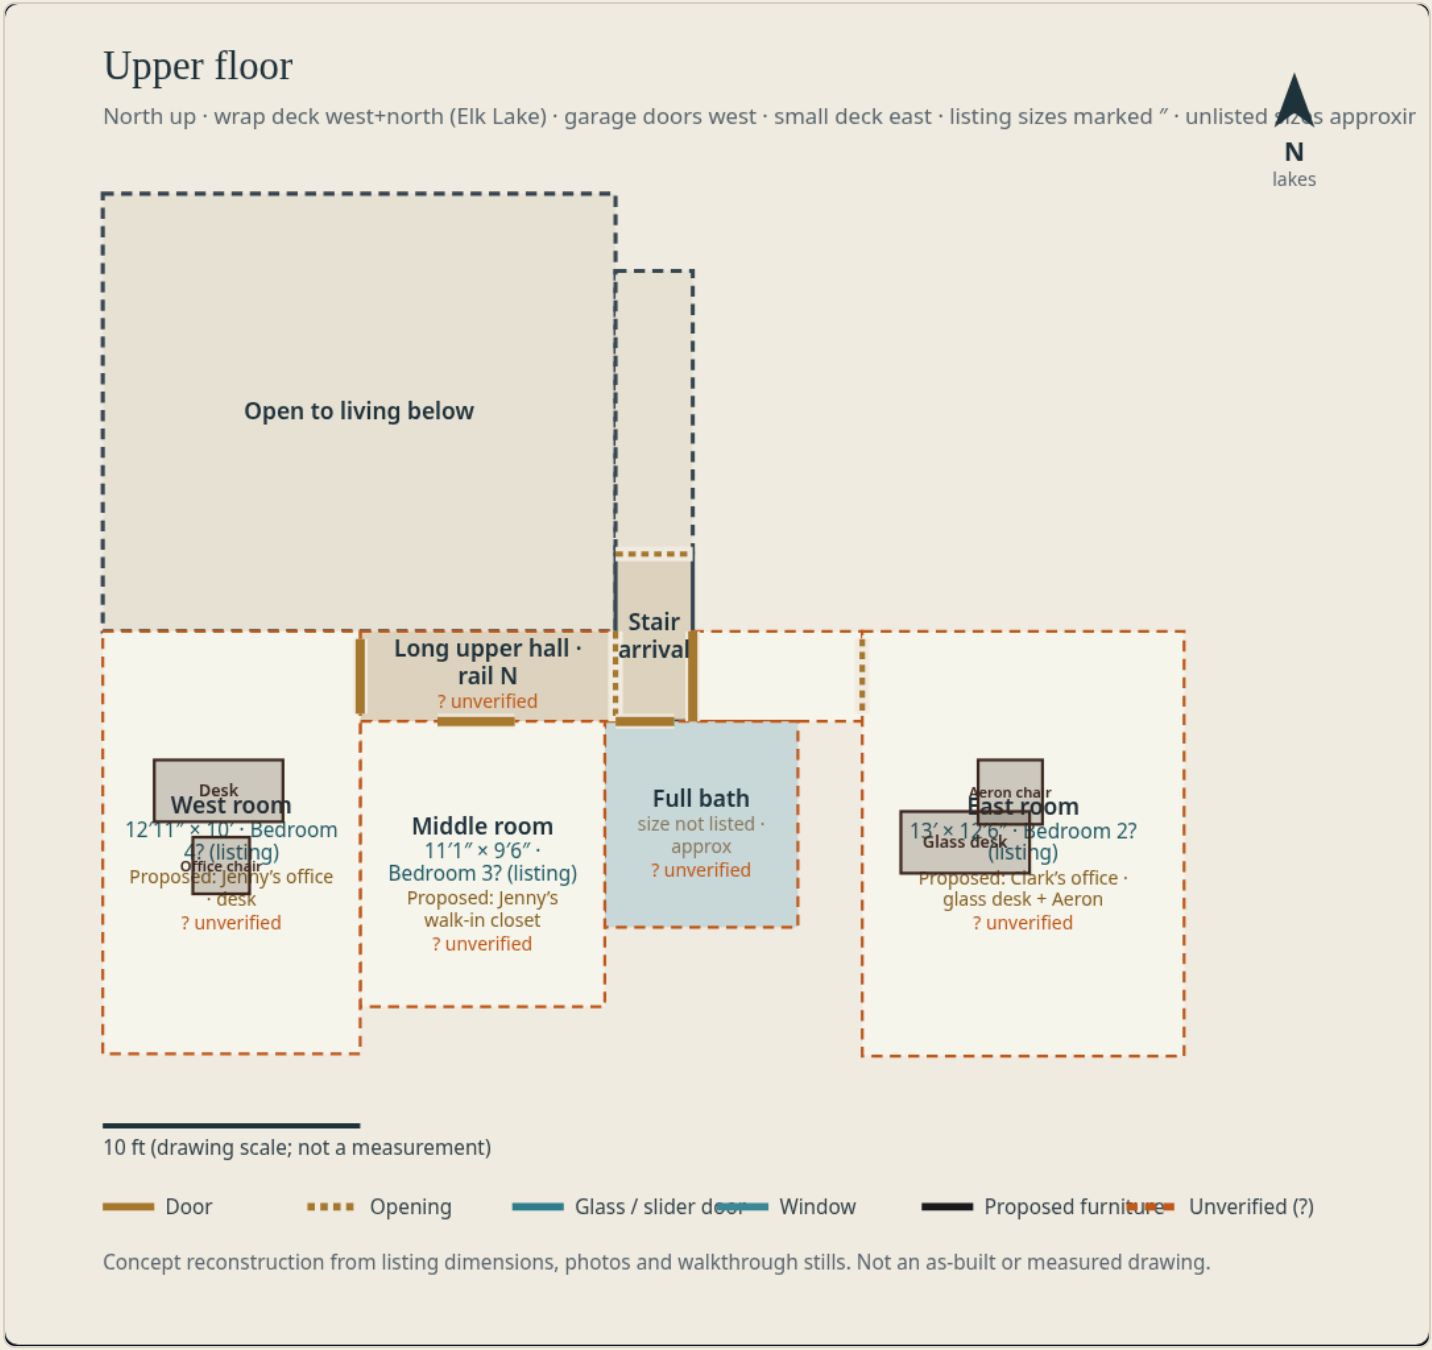
North up · listing room sizes · furniture and sauna footprints proposed



Steinway: keys north, tail south, lid to the fire (west). Sauna and plunge are on the east. Garage doors face west. Unlisted sizes are approximate.

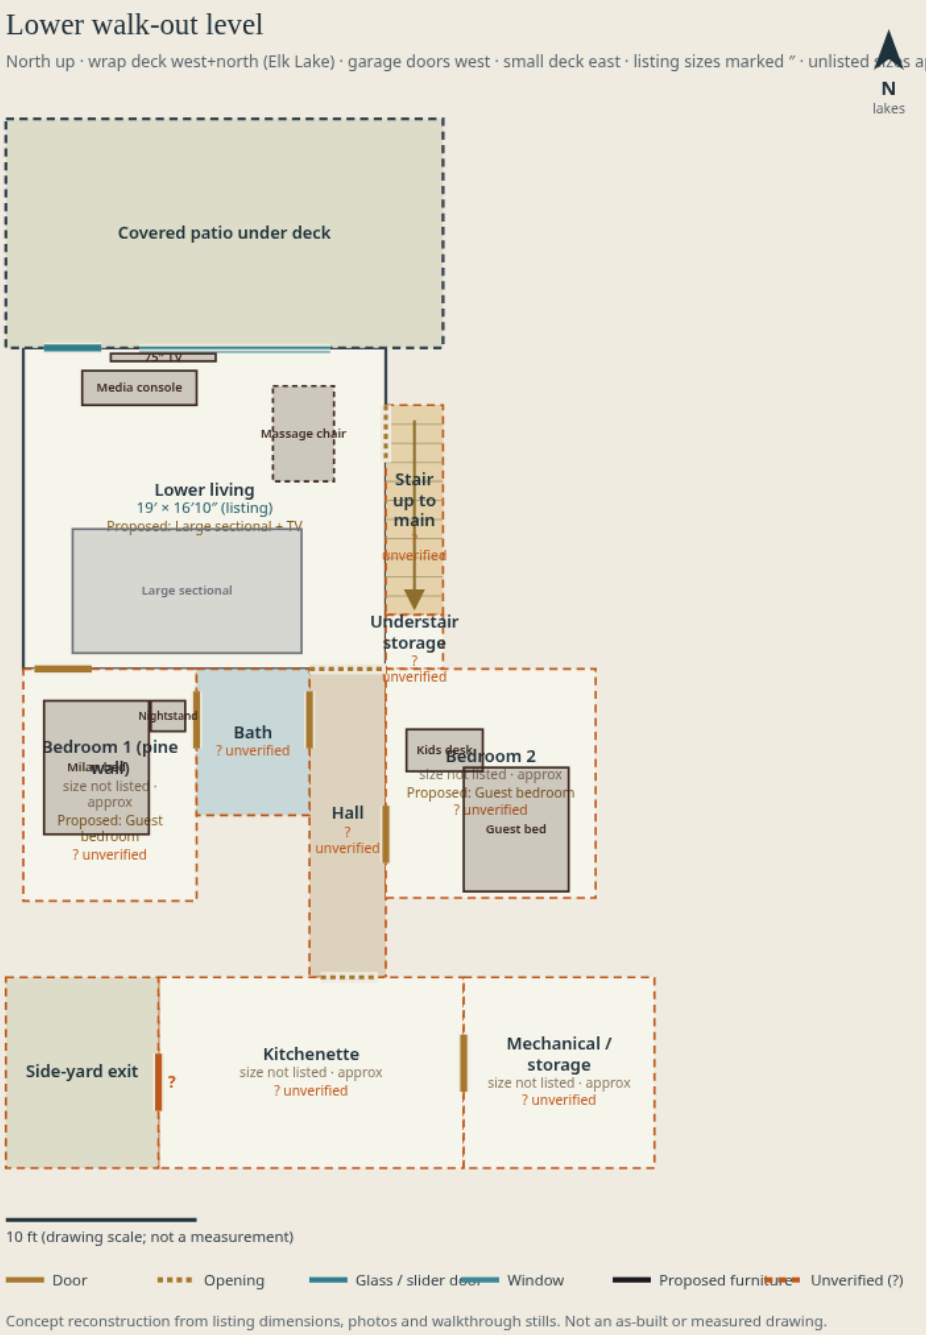
Upper floor

North up · arrival: bath almost straight ahead, slightly right; east office immediately left



Lower walk-out

North up · large sectional in the lower living area · walk-out under the north wrap deck



Concept reconstruction from listing dimensions, photos and walkthrough stills. Not an as-built or measured drawing.

3D · Site, with terrain

USGS 3DEP bare-earth elevation (2016) draped with aerial imagery. North is downhill toward Deal Rd. Barns placed from aerial offsets. Diagrammatic, not a survey.

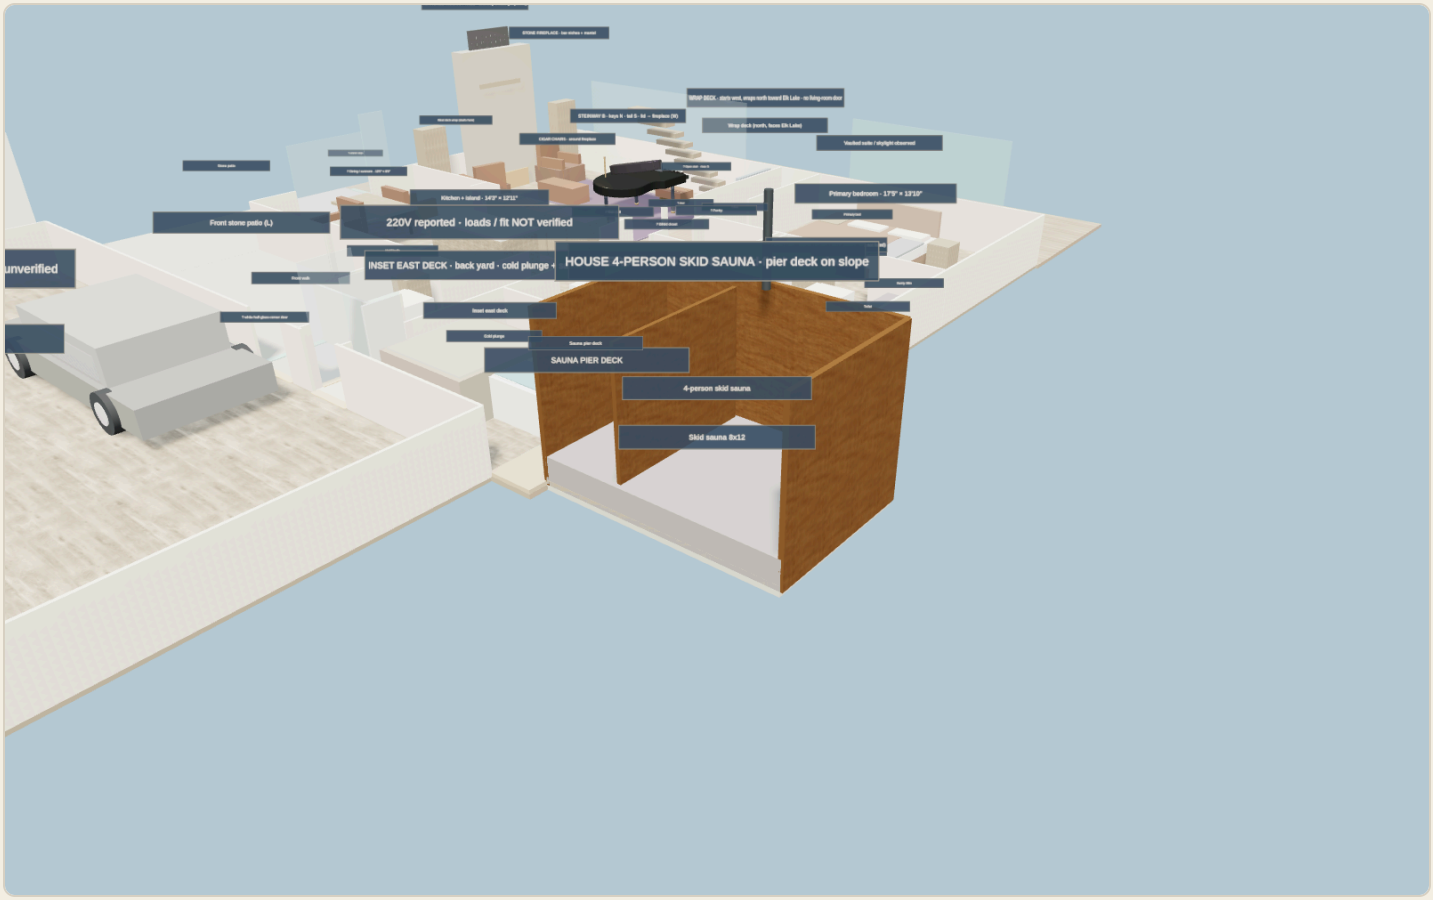
Trees are illustrative. Confirm screening and grades on site, preferably leaf-off.

3D · Living lounge

Steinway B by the stair: keyboard and bench on the north windows, tail south, lid opening west toward the fireplace. Cigar chairs at the fire.

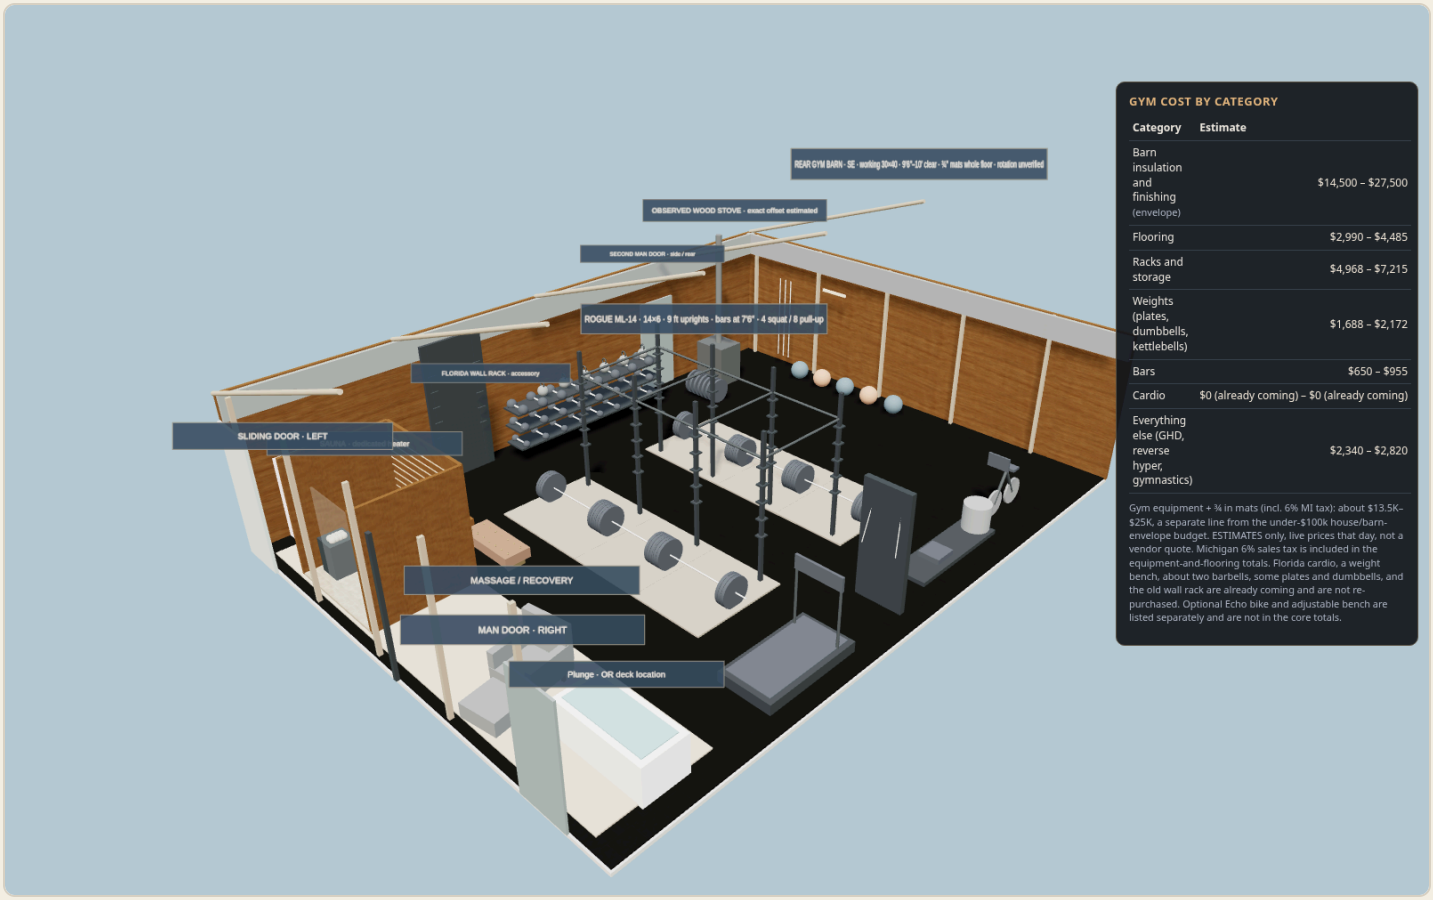
3D · East sauna + pier deck

8×12 4-person wood-fired skid sauna just east of the inset east deck (back yard). Cold plunge on the small east deck. Stove chimney away from the house eaves.



3D · Rear gym barn

Working 30×40 ft · 9′6″–10′ clear · Rogue ML-14 in the center · Florida wall rack on a side wall · ¾ in mats over the whole slab. The on-model cost panel is also on the next pages as a table.



GYM COST BY CATEGORY

Category	Estimate
Barn insulation and finishing (envelope)	$14,500 – $27,500
Flooring	$2,990 – $4,485
Racks and storage	$4,968 – $7,215
Weights (plates, dumbbells, kettlebells)	$1,688 – $2,172
Bars	$650 – $955
Cardio	$0 (already coming) – $0 (already coming)
Everything else (GHD, reverse hyper, gymnastics)	$2,340 – $2,820

Gym equipment + ¾ in mats (incl. 6% MI tax): about $13.5K–$25K, a separate line from the under-$100k house/barn-envelope budget. ESTIMATES only, live prices that day, not a vendor quote. Michigan 6% sales tax is included in the equipment-and-flooring totals. Florida cardio, a weight bench, about two barbells, some plates and dumbbells, and the old wall rack are already coming and are not re-purchased. Optional Echo bike and adjustable bench are listed separately and are not in the core totals.

After · East deck sauna and plunge

Concept photomontage from an east-side view. Not a construction drawing. Measure the east yard grade before building piers.

After · Gym barn interior

Concept view of a 30×40 pole barn with a 9′6″ ceiling, a centered 14-foot 4-station Rogue ML-14, the Florida wall rack off to the side, and ¾ in stall mats wall to wall. No turf. Existing wood stove kept. Not a product photograph or a bid.

After · Primary bath refresh (recommended)

The real shower is a prefab stall at the end of a narrow passage between a tall cabinet and the opposite wood wall (walkaround 1:42–1:48). There is no existing tub. This after-image slightly idealizes the stall opening — the passage stays narrow. Recommended work is an in-place refresh ($5k–$12k): vanity, fixtures, lighting, mirror, stall tile, and a glass door. No flooring changes. A tub would need walls moved and the drain relocated ($8k–$18k) and is not recommended.

Primary bedroom · paint palettes

Two quiet options for the east primary. Existing floors stay. Estimates $800–$2,000.

Palette A · warm greige walls, soft white trim

Palette B · soft sage walls, warm white trim

Sauna brief spec

- Footprint: 8×12 ft framing, 4-person, board-and-batten to sit with the house.
- Changing room about 4×7′6″; hot room about 7′6″ × 7′6″; two-tier L benches.
- Wood stove fired from outside through the south wall; chimney clear of house eaves (NIPPA WB-15 or Harvia M3 class).
- Foundation: pressure-treated skids on pier footings / a small pier deck over the east yard, just off the inset east deck.
- Tempered picture window(s) facing east (back yard).
- East cross-slope is about 4% over 80 ft; the steep drop is north, under the wrap deck. Piers are still reasonable if the yard falls at the deck edge. Measure on site.
- If east-slope piers are impractical: the closest east/southeast pad near the house, still in the back yard.
- Cost (materials + labor): about $12,000–$22,000, plus pier deck $4,000–$9,000. Estimates, not bids.

Primary bath options

Observed on the walkaround (bedroom at 1:16, vanity/toilet at 1:36–1:40, shower passage at 1:42–1:48): a vanity and toilet room that pinches into a narrow passage leading to a prefab fiberglass stall with sliding frosted glass. The drain is in the stall. No existing tub. The drawn bath size is about 10′10″ × 8′2″ and is unlisted — treat it as approximate.

Option	What it is	Verdict	Estimate
Recommended: in-place refresh	Keep the stall and the narrow passage. New vanity, fixtures, lighting, mirror, stall tile, and a swinging or sliding glass door.	Fits the existing layout. No flooring changes.	$5,000–$12,000
Option B: add a tub	A tub/shower combo or a separate soak would need walls moved and the drain relocated, likely with floor access from below.	**Not recommended.** Conflicts with “no flooring changes” unless work can be done from the lower level, and the passage is already tight.	$8,000–$18,000, excluded from the recommended total

> Do not treat older “Option A / Option B” after-photos as the recommended after. The recommended after is the in-place refresh, with the real shower still at the end of the narrow passage.

CrossFit gym plan

- Rear SE pole barn, placed from the aerial offset. Working size **30×40 ft** (seller sheet; MLS may list one barn as 35×40 — width still open until the slab is taped).
- Clear height to the truss bottom: **9′6″–10′** (owner walk about 10 ft; seller 9′6″). Plan to the conservative 9′6″ figure.
- Free-standing **Rogue Monster Lite Rig 2.0 ML-14** near the center: about 14×6 ft, 9 ft uprights, 4 squat stations / 8 pull-up stations, bars at 7′6″. About 24 in of headroom under a 9′6″ bottom chord. Do not order 12 ft uprights.
- Florida wall-mounted rack is a side-wall accessory only — not the main 4-station setup.
- ¾ in rubber stall mats over the entire slab (1,200 sf / two 25-packs at 30×40). If the barn is 35×40, add a third bundle or a hybrid fill.
- Cardio already coming: Peloton, Xebex treadmill, EnergyFit rower/SkiErg. Wood stove stays on a side wall.
- Electric is present. No plumbing was observed. A barn bathroom is a future optional item, not in the core gym buy.
- Default: no rope climb (the ceiling is tight). Rings can hang from the trusses. Wall-ball to about 9 ft.
- Barn envelope (insulation, plywood, mini-split, lighting) is in the under-$100k house budget. Equipment and mats are a separate line.

Gym cost by category

Live prices November 9, 2026. ESTIMATES only, not a vendor quote. Michigan 6% sales tax is included in the equipment-and-flooring headline, not in the raw category rows below (except as noted).

Category	What's in it	Low	High	Budget
Barn insulation and finishing	Insulated walls and plywood, mini-split, lighting and electrical.	$14,500	$27,500	House / barn envelope
Flooring	¾ in stall mats, whole slab. Low: two Rogue 25-packs (30×40). High: three packs if 35×40.	$2,990	$4,485	Gym (separate)
Racks and storage	ML-14 (Base or Racked), 9 ft uprights, anchors, safety arms, plate storage, plate tree, 3-tier DB/KB rack. Florida wall rack already owned.	$4,968	$7,215	Gym (separate)
Weights (plates, dumbbells, kettlebells)	One 260 lb bumper set and a working kettlebell set. Count Florida plates and dumbbells before ordering more.	$1,688	$2,172	Gym (separate)
Bars	Two additional Ohio Bars and collars so four stations have bars. About two bars already coming.	$650	$955	Gym (separate)
Cardio	Treadmill, Peloton, and rower/SkiErg already coming. Optional Echo bike ($945–$1,845) is not in the core totals.	$0	$0	Gym (separate)
Everything else (GHD, reverse hyper, gymnastics)	Rings, a GHD, wall-ball targets and balls, four plyo boxes, speed ropes. A reverse hyper is not in this estimate (later add-on if wanted).	$2,340	$2,820	Gym (separate)

Gym equipment + flooring, including 6% tax: about $13,500–$25,000. The high end leaves room for the Better tier, a 35×40 floor, and the listed optional Echo bike and bench. This line is separate from the under-$100k house / barn-envelope budget.

Rogue freight is often free when the ML-14 is in the cart — confirm at checkout. Sale prices can expire. Confirm ceiling height and slab thickness on site before ordering.

Renovation budget (estimates)

Northern Michigan ballpark, November 2026. ESTIMATES only, not bids. No flooring changes in the house.

Item	Low	High
Primary bedroom paint refresh	$800	$2,000
Primary bath in-place refresh	$5,000	$12,000
Powder / other bath small updates	$1,500	$4,000
4-person wood-fired skid sauna (materials + labor)	$12,000	$22,000
Sauna pier deck / east-yard platform	$4,000	$9,000
Gym barn: insulated walls + plywood lining	$8,000	$15,000
Gym barn: mini-split heat/cool	$4,000	$8,000
Gym barn: lighting + electrical upgrades	$2,500	$4,500
Contingency (~10%)	$4,500	$6,500
House / barn-envelope recommended total	**$42,300**	**$83,000**
Gym equipment + ¾ in stall mats (separate line; incl. 6% MI tax)	$13,500	$25,000
Optional tub conversion (not recommended; not in either total)	$8,000	$18,000

> A barn bathroom is a future optional item, not in either total. Option A (tie into the house water and septic) is about $15K–$42K, plus possible septic enlargement — the 1993 system was sized for a 4-bedroom house; the listing is 6 bedrooms. Option B (separate well and septic for the rear barn) is about $30K–$65K. Accessory use only (no bedroom or kitchen). Health-department and township permits required. Estimates only.

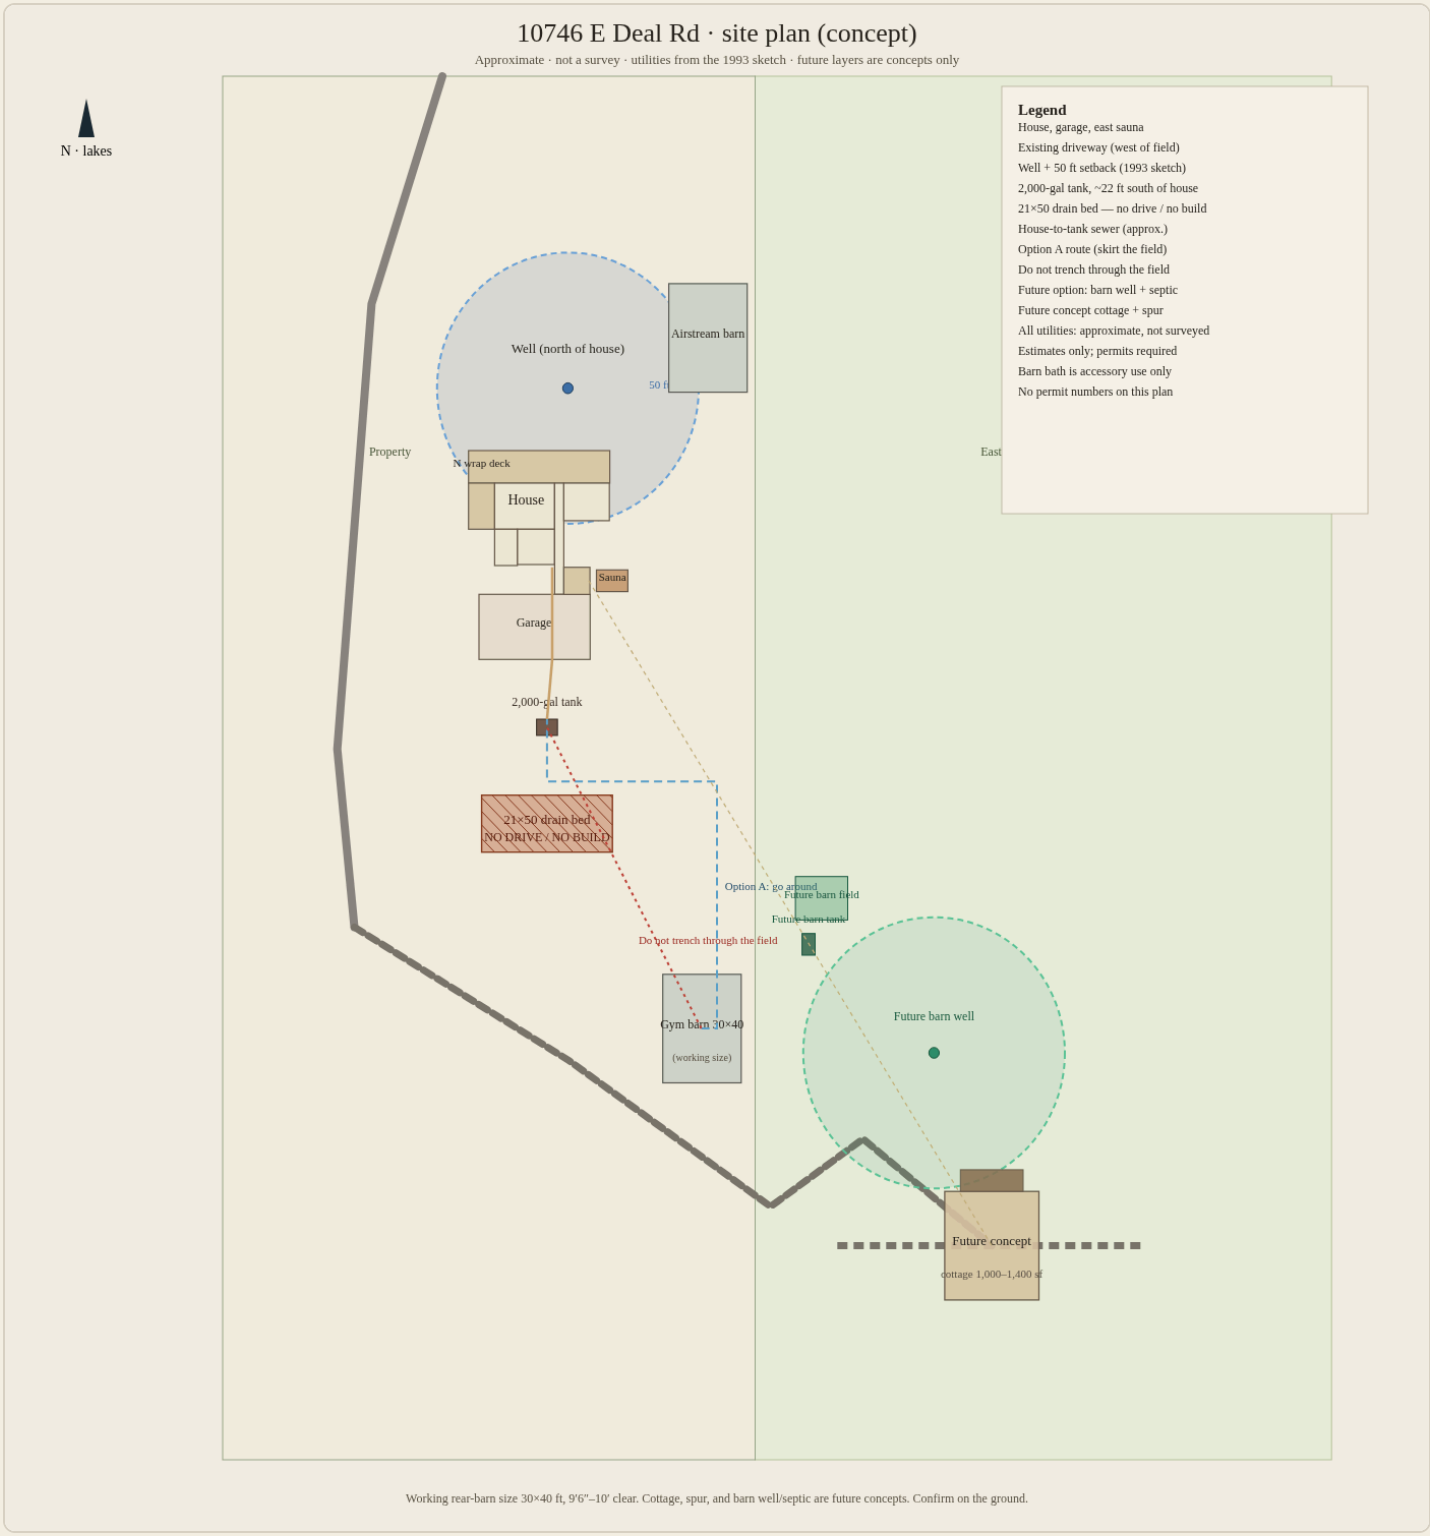
Furniture placement (excerpt)

Florida furniture only. Proposed locations; some clearances unverified.

Piece	Where	Notes
Steinway Model B	Living, by the stair, across from the fireplace	Keys / bench north (windows); tail south; lid / treble west toward the fire. About 3 ft bench clearance. Fits in the 17 ft north–south living room.
Cigar chairs	Around the living-room fireplace (west wall)	Leave a walking path west of the piano to the fire.
Bar niches / bar cart	Fireplace built-ins, sides and mantel	Schematic.
Mirrored / black rectangular art	Living chimney breast	Proposed.
Large sectional	Lower living, facing the north windows	Walk-out under the wrap deck.
Peloton, treadmill, rower / SkiErg	Rear gym barn, cardio bay	Already coming; not re-purchased.
Florida wall rack	Rear gym, side wall	Accessory only. Main stations are on the ML-14.
Vehicles	Garage (west doors) and the NE barn	Model Y and Cadillac in the garage (fit unverified). Airstream 24X in the front barn.

Site plan · utilities and access

Approximate, from the 1993 as-built sketch and aerial offsets, not a survey. Locate the wellhead, tank lids, and drain field on the ground before digging or building. No permit numbers on this plan.



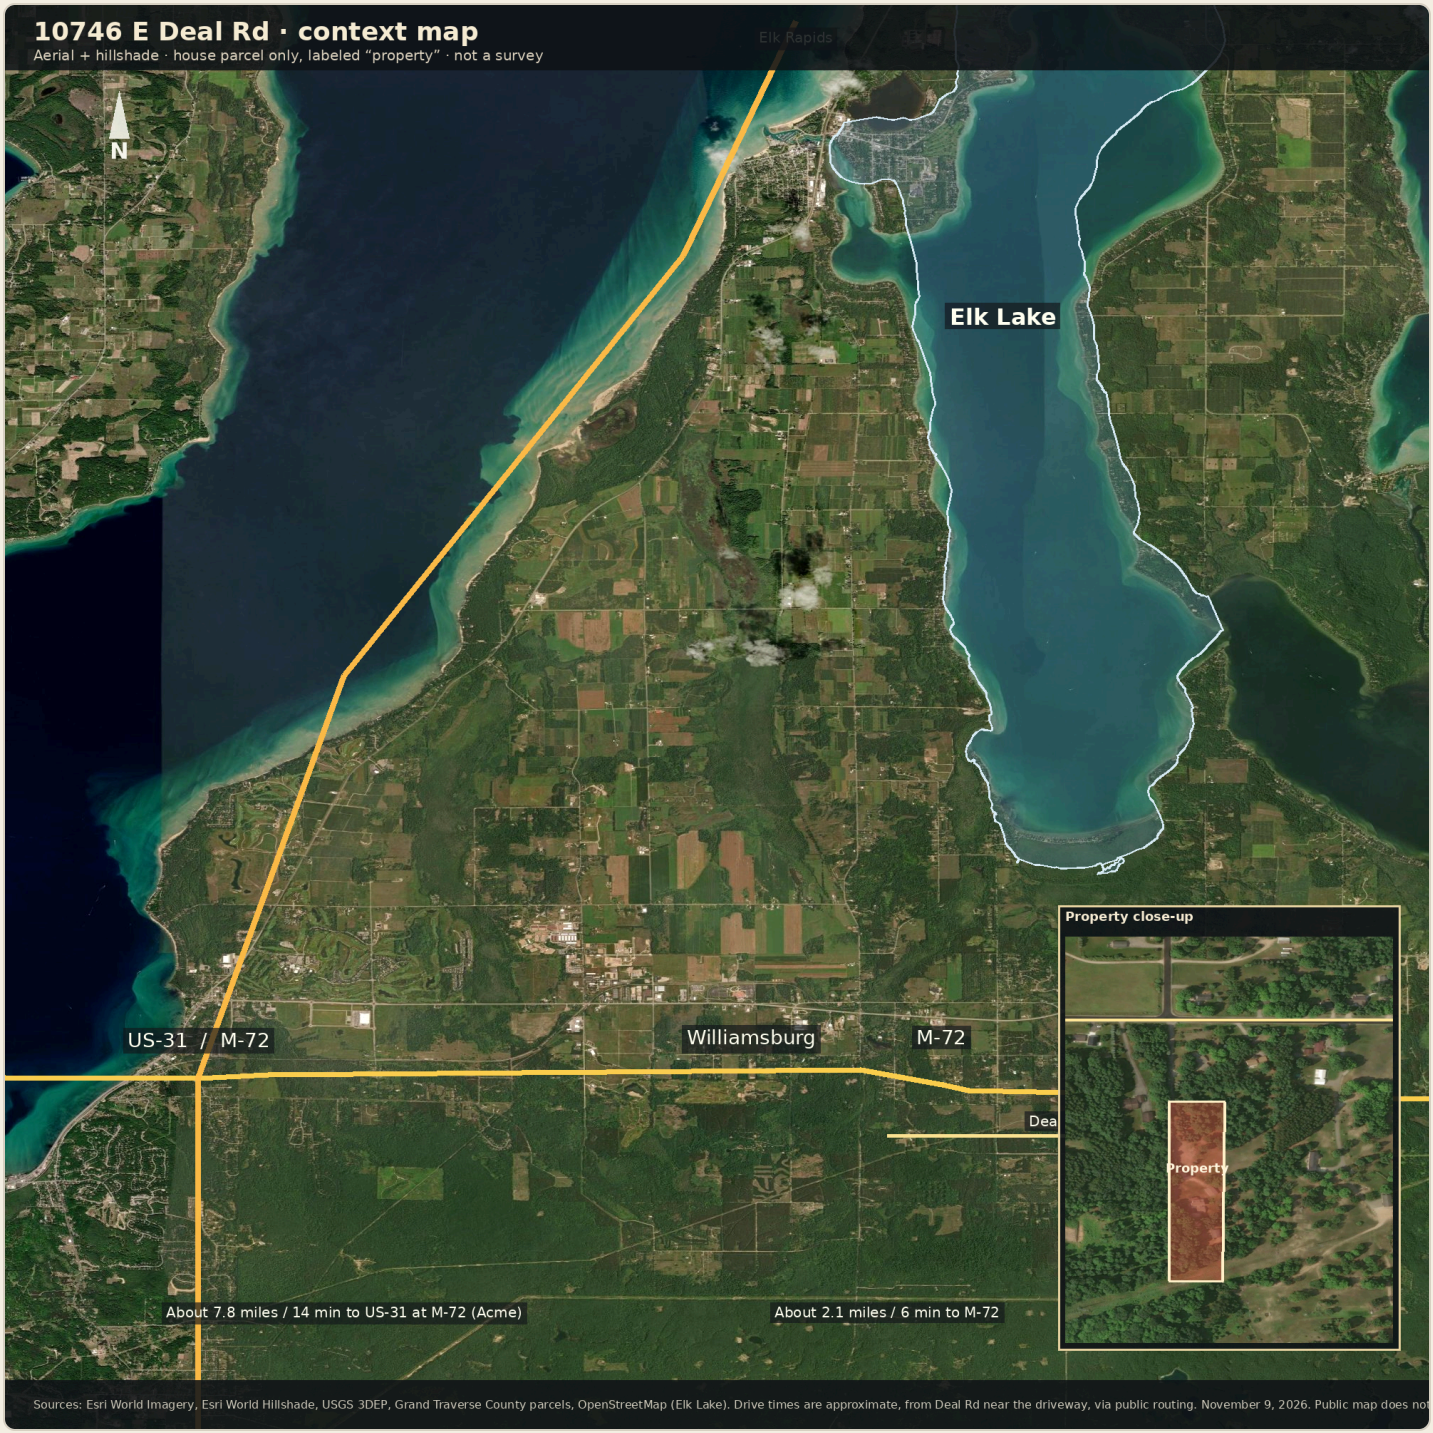
Future concept · cottage, driveway, and trail

Toggleable “Future concept” layer in the 3D model — not a construction plan or a land-use application.

- About 1,000–1,400 sf, 1.5 stories, 2 bedrooms, on the east land, southeast of the gym barn and clear of both barns.
- North-facing porch / deck toward distant, elevated Elk Lake views. The cottage sits uphill and south of the main house so it is out of the primary north view from the wrap deck.
- The east land does not have its own Deal Rd frontage. Recommended access is a gravel spur off the existing driveway, staying south of the drain field, with a hammerhead turnaround at the cottage (about 300 ft of spur). Do not use the unpaved east track as legal access until a survey confirms rights. The existing drive itself likely already crosses neighbor frontage — a title / easement item.
- Bare-earth sightlines from the east deck to a cottage roof are not blocked by terrain. Screening depends on the gym barn, existing south-edge trees, and a proposed 20–30 ft evergreen or mixed buffer on the cottage’s north-west side, with an optional low berm if leaf-off views remain open.
- A future barn well (see utilities option B) could also serve the cottage. A cottage septic would still need its own 50 ft setback. Perc test, well, and health-department layout required.
- Driveway costs are estimates only: gravel 12 ft on the order of $4–$9/sf; asphalt $8–$16/sf. A dead-end longer than about 150 ft often needs a turnaround and maybe a 20 ft width — confirm with the township and fire department.
- Confidence: moderate (2016 bare-earth 1 m DEM; trees are not in the DEM). Confirm on site, preferably leaf-off. Zoning for a second dwelling or accessory dwelling, setbacks, and legal access are still to verify.

Context map

House parcel only, labeled “property.” Aerial + hillshade. Drive times are approximate, from Deal Rd near the driveway. About 2.1 miles / 6 minutes to M-72 at Williamsburg, and about 7.8 miles / 14 minutes to US-31 at M-72 (Acme). Elk Lake is to the north / northeast — a distant, elevated view, not waterfront. Not a survey.



Utilities overlay (3D)

Well north of the house with a 50 ft setback; 2,000-gal tank about 22 ft south; 21×50 drain bed (no-drive / no-build); house-to-tank sewer. A straight trench from the gym barn to the tank would cut the field — option A must go around it. Future barn well and septic are a separate toggle. Approximate, from the 1993 sketch, not surveyed.

Still to verify

- Tape the rear barn slab and the clear height under the lowest truss, light, and door track (30×40 vs 35×40; 9′6″ vs 10 ft).
- Locate the wellhead, tank lids, and the 21×50 drain field on the ground. Confirm they match the 1993 sketch before any trench, spur, sauna pier, or barn sewer.
- 1993 septic was permitted for a 4-bedroom house; the listing is 6 bedrooms. Ask the health department for a status review before adding a barn bath. Last disclosed pump-out was November 2019.
- Well log depth (145 ft) vs seller disclosure “218 ft” — confirm on the walk. New coliform and nitrate test.
- Title / easement for the existing driveway (the house parcel does not reach Deal Rd). Do not assume the unpaved east track is legal access.
- Township zoning for a second dwelling or accessory dwelling on the east land; setbacks; perc test; fire-department turnaround rules.
- East-yard grade at the sauna pier; stove clearances; 220V at the east deck (reported, not verified).
- Wood foundation: specialist moisture / structural look, drainage, radon.
- Garage clear width (MLS 2-car vs seller 2.5-car) and the piano moving path.
- Whether the rear-barn wood stove is the seller-sheet ducted heating system; combustion air, chimney, and CO protection.
- Time-of-transfer well/septic evaluation (in effect 2026) likely does not apply (not waterfront / probably not within 300 ft of surface water) — confirm.
- All unlisted room sizes, exact door offsets, and which listing bedroom is which upstairs.
