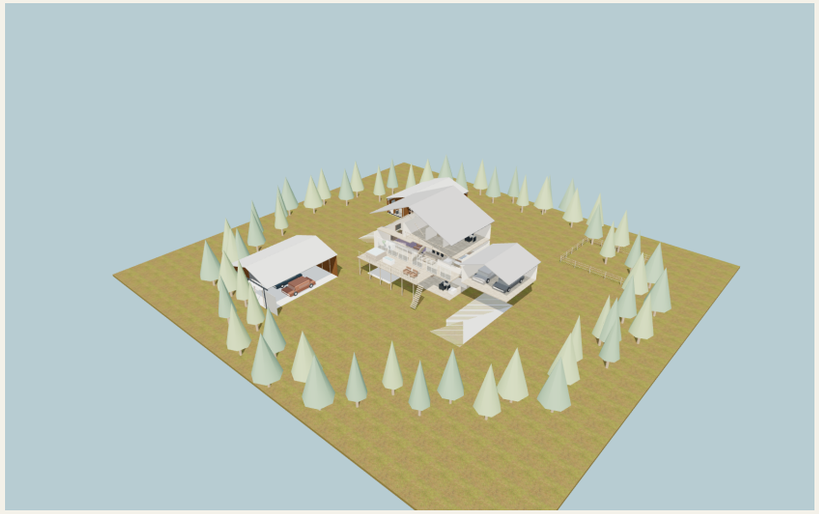
OUR TOP CHOICE · WILLIAMSBURG, MICHIGAN

A home for music, movement & recovery



The main-floor nightclub lounge, a proper primary suite, an apartment-style lower level, two offices and Jenny’s closet room. Two barns: the vehicle gallery and the CrossFit box.

Interactive model + all listing photos
clarkhuang.github.io/10746-deal-rd/

A photo-informed design study—not a measured floorplan, inspection, survey or construction drawing. Furniture and vehicles are conceptual proxies.

The complete listing highlights

Property

MLS 1952304 · $699,000 asking · 4.23 acres · 1993 contemporary · Elk Rapids Schools

Views + setting

Elk Lake views, NOT waterfront. Rolling/sloped wooded and open ground, fenced corral. Asphalt/shared driveway; survey and easement require review.

Kitchen + utility

Stainless appliances, granite, tile backsplash, bar seating, pantry; main-floor laundry and wash basin; central vacuum. Listing includes water softener/filtration and washer/dryer.

Updates claimed

Home and one outbuilding roof, appliances, boiler, water heater and paved driveway. “No deferred maintenance” is a seller/listing claim, not an inspection.

Space

3,120 sq ft advertised; 1,956 above / 1,164 finished walk-out from earlier listing research. Six bedrooms / 3.5 baths in remarks; structured bath fields conflict.

Architecture

Vaulted living room, stone fireplace, skylights, built-ins, warm tongue-and-groove accents, generous deck with retractable awning.

Comfort

Natural-gas boiler/baseboard heat and ductless cooling per MLS; seller sheet adds ducted wood stove heating, Generac 10 kW generator with transferable warranty, and Richmond 50-gallon hybrid electric heat-pump water heater/dehumidifier (30 AMP). System location and operation unverified.

Construction + barns

Frame/vinyl siding, asphalt roof, WOOD foundation. Seller sheet: both pole buildings 30 × 40 ft, cement floors and electric, with 12 ft / 9 ft 6 in ceilings. MLS: 30 × 40 plus 35 × 40 ft. Conflict unresolved; model follows sheet. Garage is 2.5-car per sheet.

Seller features & recent updates

- Generac 10 kW generator with transferable warranty.
- Whole-home vacuum system.
- Front deck awning.
- Ducted wood stove heating system.
- Richmond 50-gallon hybrid electric heat-pump water heater and dehumidifier (30 AMP).
- Molon paved 817 ft of road (August 2022).
- Horse corral.
- Two pole buildings, each 30 × 40 ft according to the seller sheet: one with a 12 ft ceiling and one with a 9 ft 6 in ceiling; both have cement flooring and electric.

Seller-sheet statements, not independently inspected. Barn dimensions are unresolved: the sheet says both 30 × 40 ft; MLS says 30 × 40 ft plus 35 × 40 ft. The model follows the sheet at 30 × 40 ft each. Assigning the FRONT Airstream barn the 12 ft ceiling and REAR gym the 9 ft 6 in ceiling is an assumption to confirm. The 9 ft 6 in ceiling limits rope climbs and high overhead work; verify actual working clearances. The previously described furnace is likely the ducted wood stove heating system; its location (house or barn) remains unconfirmed.

Seller updates

- Basement kitchen: new counter, sink, microwave, electric stove and refrigerator (2019).
- New toilets in powder room and basement bathroom (2019).
- New carpet throughout (2017).
- Tile throughout basement (2018).
- New built-in closets and paint in basement (2018).
- New ceilings in basement (2019).
- New side decking and drainage (2019).
- Remodeled attached 2.5-car garage: moisture-resistant paint, new molding and entry door, new counter and cabinets, door seals and aluminum, new drain basket (2019).

Seller updates · continued

• Main-level kitchen: new microwave, gas stove, refrigerator and steam dishwasher—all LG black stainless appliances (2018).

• New granite countertops in kitchen, primary bath and guest bath (2019).

• New ¾ HP well pump and fiberglass tank (2018).

• New roof on home and pole barn with transferable warranty: full tear-off, new drip edge and white fascia; Landmark Pro Max Defender shingles in Weathered Wood (2019).

• New plug outlets, switches and LED daylight bulbs throughout home and garage (2019).

• Two new garage door openers (2018).

• New paint in primary bedroom/bath and main-level powder room (2019).

RE/MAX additional property features sheet

RE/MAX of Elk Rapids

10746 Deal Rd. - Additional Property Features / Special Notes

- Generac 10 kW generator with transferable warranty
- Whole-home vacuum system
- Front deck awning
- Ducted wood stove heating system
- Richmond 50-gallon hybrid electric heat pump water heater & dehumidifier (30 AMP)
- Molon paved 817 ft of road (August 2022)
- Horse corral
- Two pole buildings (30′ × 40′):
  – One with 12′ ceiling
  – One with 9′6″ ceiling
  – Both have cement flooring and electric

Recent Home Updates

- New basement kitchen – counter, sink, microwave, electric stove, and fridge (2019)
- New toilets in powder room and basement bathroom (2019)
- New carpet throughout (2017)
- Tile throughout basement (2018)
- New built-in closets and paint in basement (2018)
- New ceilings in basement (2019)
- New side decking and drainage (2019)
- Remodeled attached 2.5-car garage: moisture-resistant paint, new molding and entry door, new counter and cabinets, door seals and aluminum, new drain basket (2019)
- Main-level kitchen: new microwave, gas stove, fridge, and steam dishwasher – all LG black stainless appliances (2018)
- New granite countertops in kitchen, primary bath, and guest bath (2019)
- New ¾ HP well pump & fiberglass tank (2018)
- New roof on home and pole barn with transferable warranty – full tear-off, new drip edge, and white fascia. Landmark Pro Max Defender shingles in Weathered Wood (2019)
- New plug outlets, switches, and LED daylight bulbs throughout home and garage (2019)
- Two new garage door openers (2018)
- New paint in primary bedroom/bath and main-level powder room (2019)

The main-floor nightclub lounge

3D CONCEPT · estimated arrangement

LISTING PHOTOGRAPH · existing condition

Retain the vaulted ceiling, skylights, stone wood-burning fireplace and built-ins. Steinway Model B and bench become the focal piece, with two cigar chairs, tufted bench and mirrored art panel. Warm brass accents, dimmable amber lamps and a restrained violet wash create the nightclub feeling without blocking the view. Keep the sectional downstairs.

Field measurements govern furniture fit, door positions and circulation. Concept image is not an exact reconstruction.

Primary suite on the main level

3D CONCEPT · estimated arrangement

LISTING PHOTOGRAPH · existing condition

Clark and Jenny’s primary bedroom remains on the MAIN level, with private bath. Bed and nightstand proxies are conceptual; actual primary furniture dimensions are not recorded. Preserve laundry with wash basin nearby.

Field measurements govern furniture fit, door positions and circulation. Concept image is not an exact reconstruction.

Keep the kitchen, dining & warm finishes

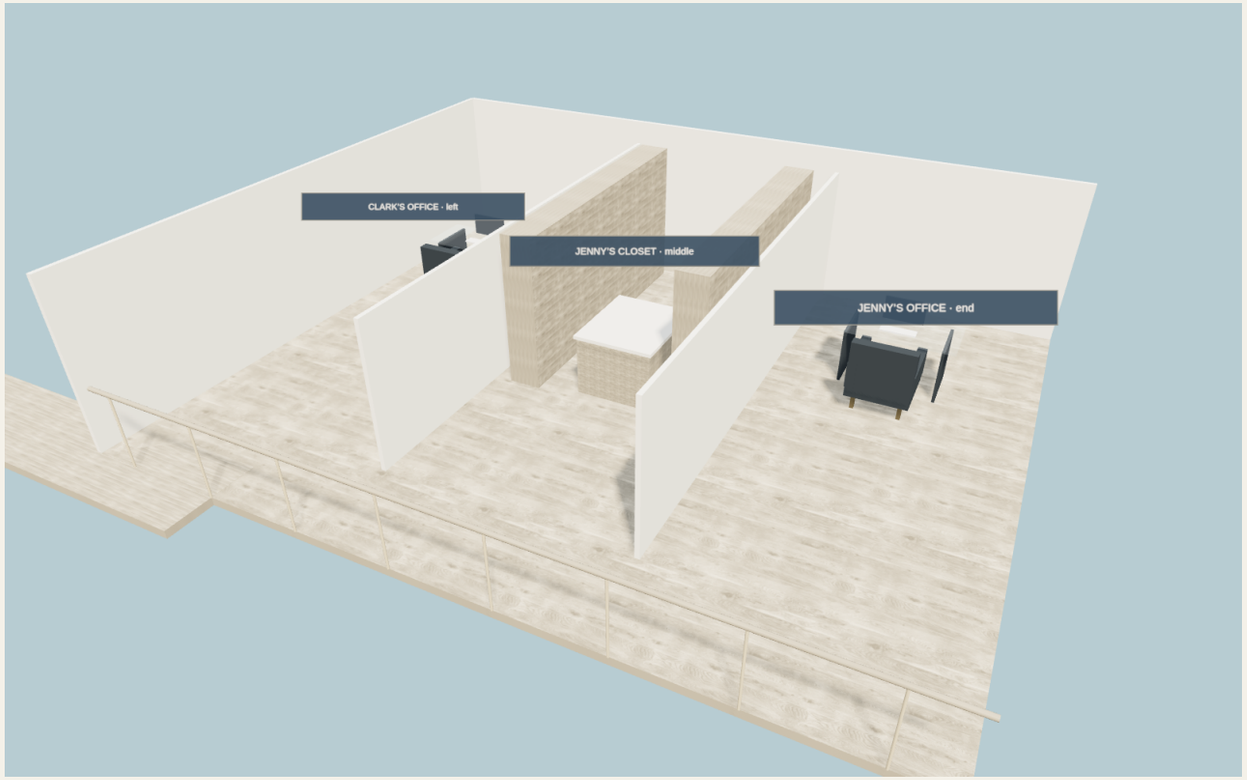
3D CONCEPT · estimated arrangement

LISTING PHOTOGRAPH · existing condition

Keep the stainless appliances, granite counters, tiled backsplash and bar seating. Retain a dining table rather than importing the Samels island remodel. Counter and dining positions are approximate.

Field measurements govern furniture fit, door positions and circulation. Concept image is not an exact reconstruction.

Offices at the ends. Closet in the middle.



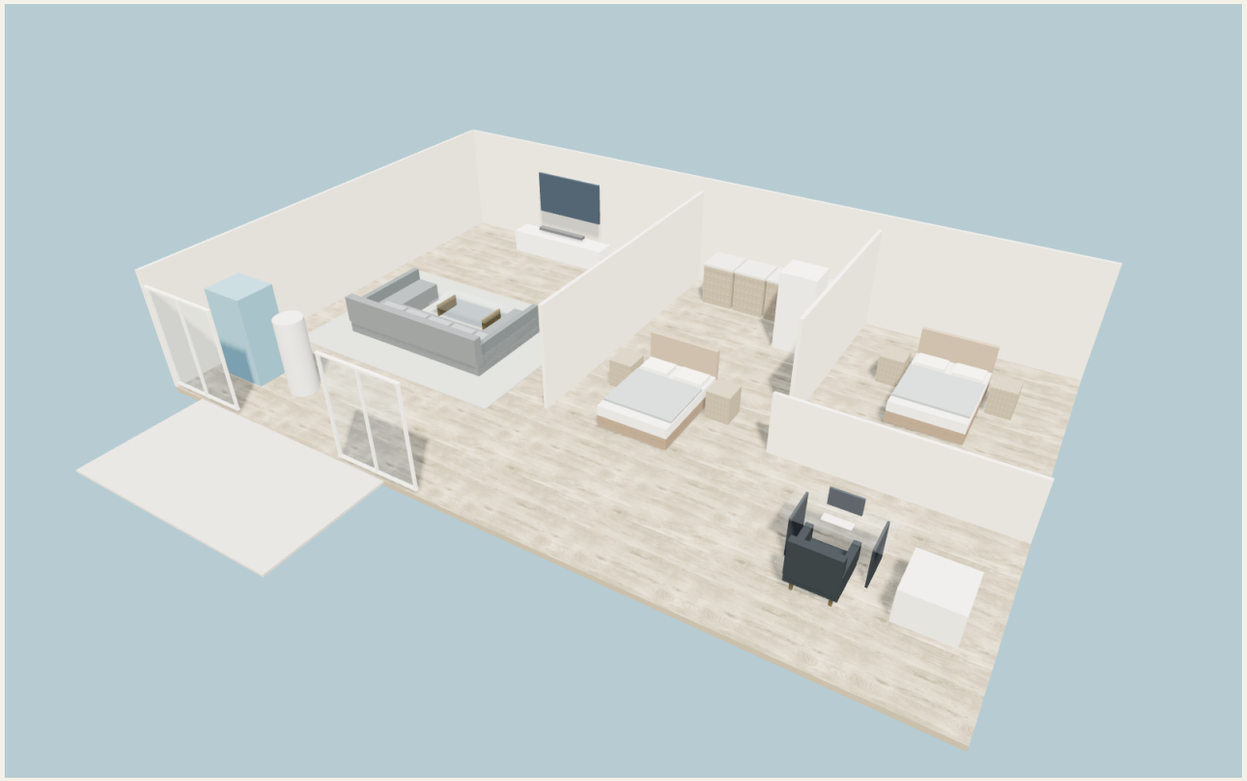
3D CONCEPT · estimated arrangement

LISTING PHOTOGRAPH · existing condition

Left-side room: Clark’s office, glass-top desk and Aeron chair. Middle room: Jenny’s full-room walk-in closet. Other end room: Jenny’s office. Open catwalk overlooks the lounge. Exact room sequence and partitions are approximate pending measured plan; the listing’s bedroom count and upper-room description conflict.

Upstairs left = Clark’s office; middle = Jenny’s full-room closet; other end = Jenny’s office. Listing bedroom allocation conflicts; partitions here are estimates, not a verified floorplan.

A complete apartment-style lower level



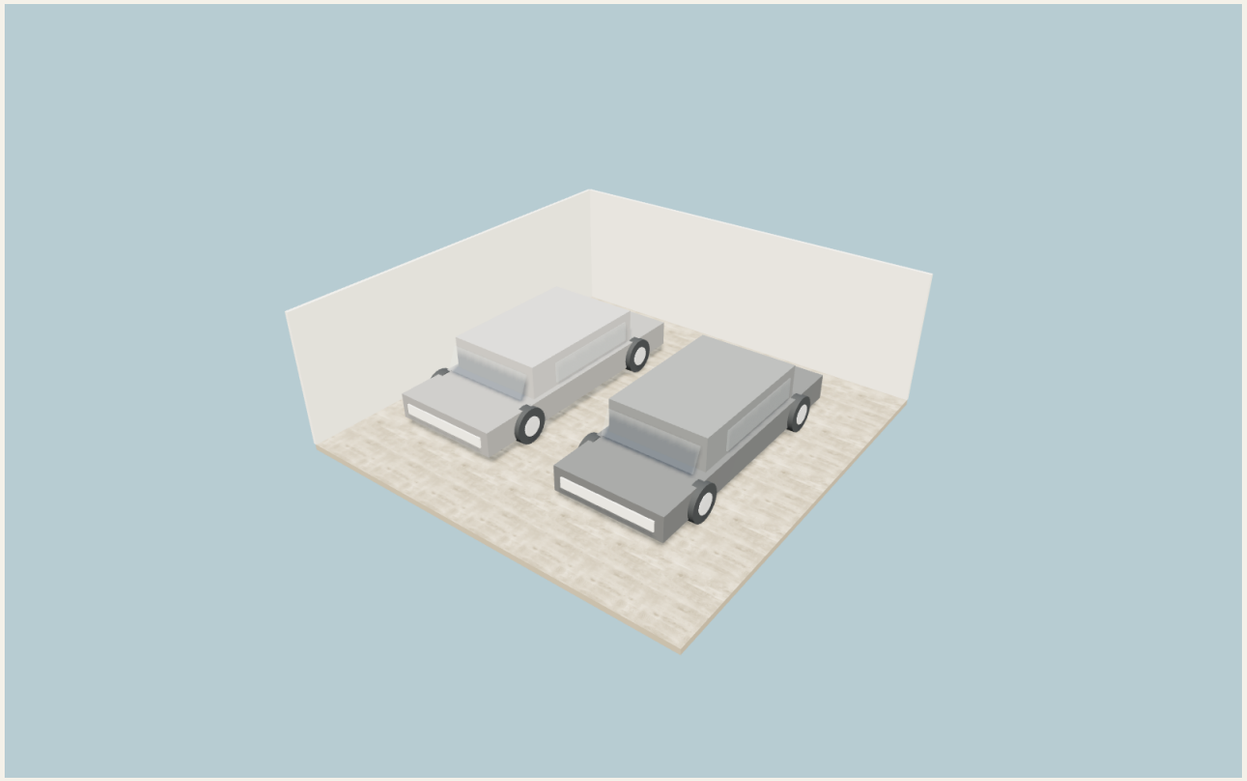
3D CONCEPT · estimated arrangement

LISTING PHOTOGRAPH · existing condition

Separate exterior entrance, second kitchen, family room, two bedrooms, bath and storage. Florida sectional (11 × 6 ft placeholder), media console, 75-inch TV and soundbar in the living area; Milan’s full bed/nightstand and children’s desk set in the guest rooms. Layout is not verification of legal independent dwelling or rental use.

Field measurements govern furniture fit, door positions and circulation. Concept image is not an exact reconstruction.

The attached 2.5-car garage



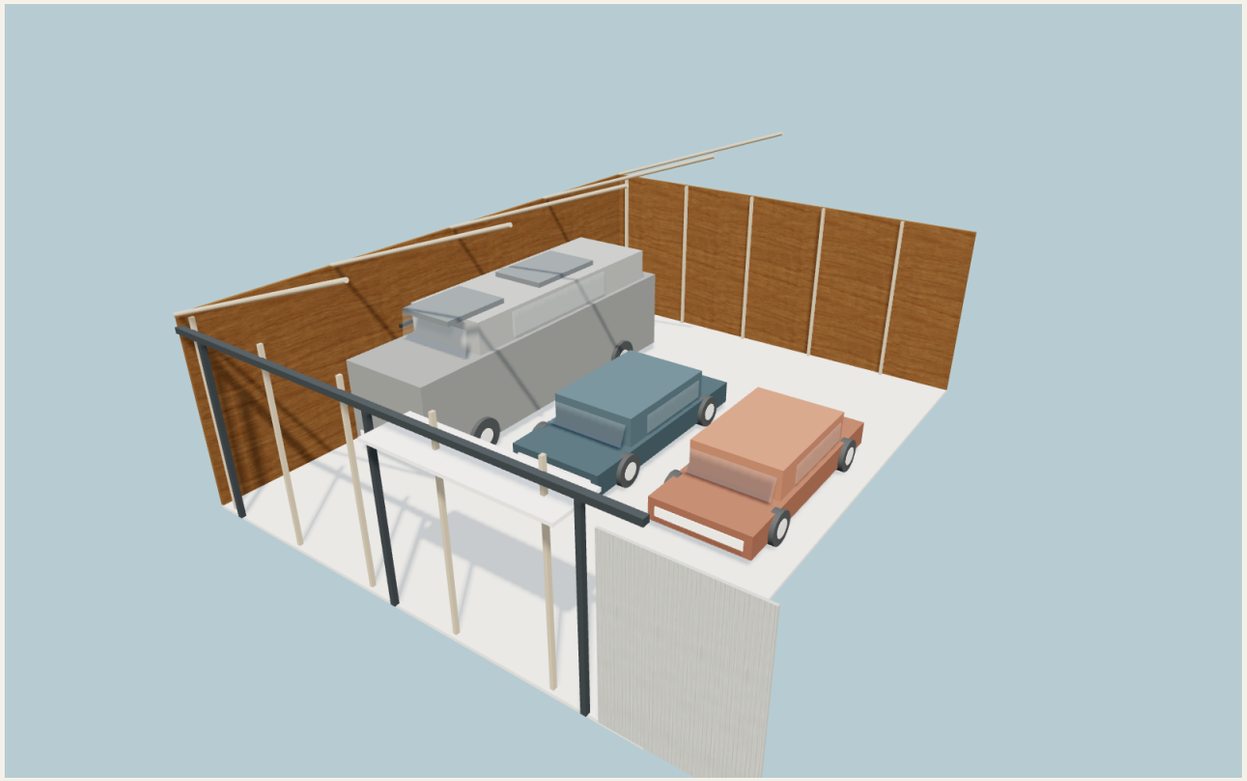
3D CONCEPT · estimated arrangement

LISTING PHOTOGRAPH · existing condition

2023 Tesla Model Y and Jenny’s Cadillac XT5. Clark does not own the Cadillac. Seller sheet identifies a 2.5-car garage. The model retains an unmeasured 24 × 24 ft planning envelope; door widths, turning space and actual interior dimensions must be measured.

Field measurements govern furniture fit, door positions and circulation. Concept image is not an exact reconstruction.

The front barn · the vehicle gallery



3D CONCEPT · estimated arrangement

LISTING PHOTOGRAPH · existing condition

Front barn modeled 30 × 40 ft per seller sheet, with assumed 12 ft ceiling (assignment to confirm); MLS gives a conflicting 35 × 40 ft for one barn. BOTH an overhead garage door and a large sliding-door section, confirmed by Clark to clear the Airstream. Place the 2022 Airstream Interstate 24X 4x4 on 2021 Mercedes Sprinter 3500 chassis, owned Mustang and wishlist Porsche here. Model uses approximate generic vehicle envelopes, not detailed manufacturer replicas.

Seller sheet: front modeled 30 × 40 ft, 12 ft ceiling assigned provisionally; MLS size conflict unresolved. BOTH overhead and sliding barn doors. Vehicle proxies are approximate. Exact door dimensions and maneuvering have not been measured.

The rear barn · a full CrossFit box

3D CONCEPT · estimated arrangement

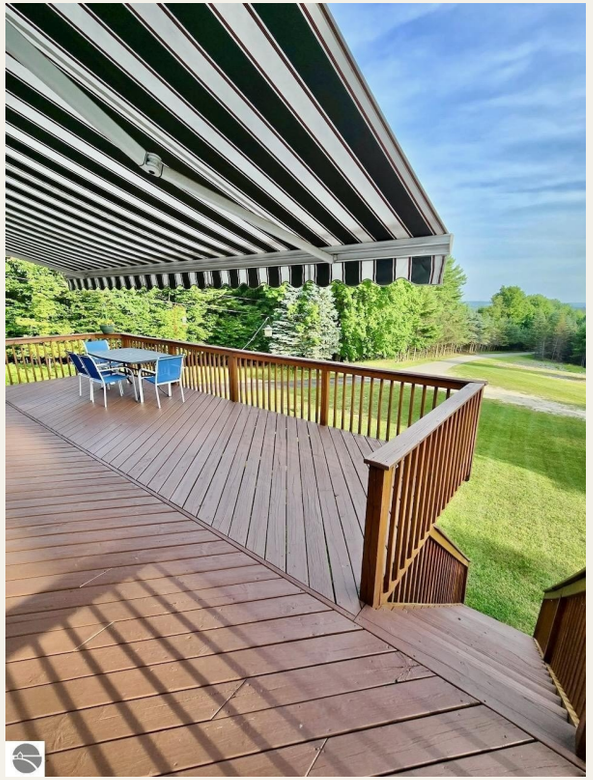
LISTING PHOTOGRAPH · existing condition

Rear barn modeled 30 × 40 ft with assumed 9 ft 6 in ceiling (assignment to confirm). This limits rope climbs and high overhead work. Full CrossFit gym transferred from the Samels concept: four barbell stations, rig, pull-ups/rings, rubber lifting floor, turf sled lane, Peloton, rower/SkiErg, treadmill, dumbbells, kettlebells, plates, wall balls, benches and boxes. Separate recovery area: sauna with dedicated heater and massage chair; the cold plunge can stay here OR go outside on the house deck. Show the building insulated and plywood-lined like a CrossFit box. A normal man door is confirmed; a possible garage door is unverified. Wood-stacked interior is the reference; the likely ducted wood stove heating system’s location (house or barn) remains unverified.

Rear modeled 30 × 40 ft; 9 ft 6 in ceiling assignment assumed, limiting rope climbs and high overhead work. Normal man door; garage door possible, unverified. Plywood-lined / insulated concept. Furnace position is unverified: no working sauna connection assumed.

The small deck · spa alternatives

3D CONCEPT · estimated arrangement

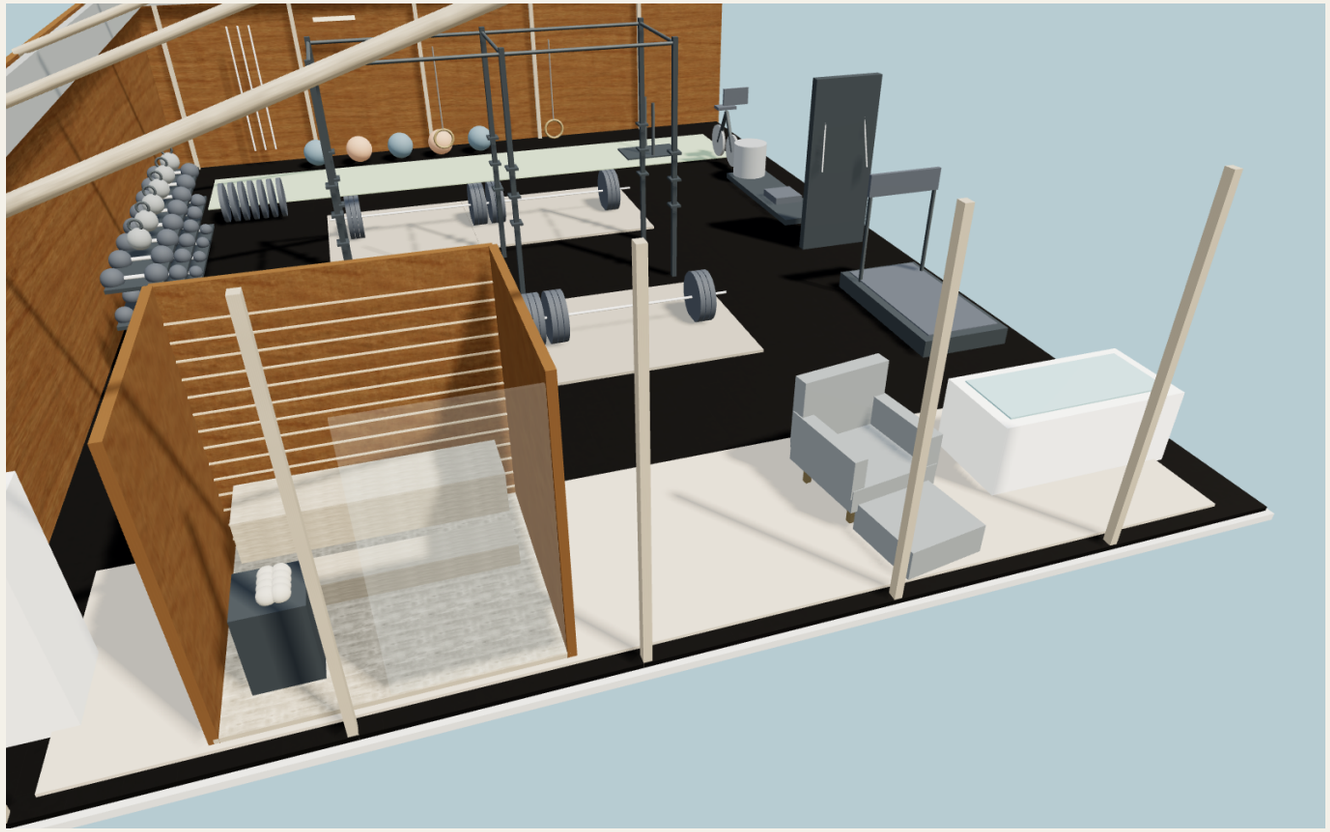


LISTING PHOTOGRAPH · existing condition

Clark reports a 220V supply. Show a hot tub OR an alternative deck sauna, not both together, with an optional cold plunge alongside. The rear-barn sauna remains the primary recovery concept. Deck structure, loading, circuit capacity, GFCI/disconnect, plumbing and permits need review before installation.

Field measurements govern furniture fit, door positions and circulation. Concept image is not an exact reconstruction.

Sauna, cold plunge & massage chair



• Sauna with a dedicated sauna-rated heater; massage chair remains in the rear-barn recovery zone.

• Cold plunge has two alternative locations: rear recovery OR outside on the small house deck—not two owned plunge units.

• Reserved wood-furnace zone is a location-unverified placeholder only. Seller sheet lists ducted wood stove heating, likely the previously described furnace; house/barn location unconfirmed. It is not positively identified in the stacked-wood photograph.

• Using a building furnace to heat a sauna is a feasibility question, not a proposed connection. Qualified review must address appliance suitability, clearances, chimney, combustion air and CO protection.

Hot tub OR sauna + optional outdoor plunge

Option A: hot tub + outdoor plunge location

Option B: deck sauna + outdoor plunge location

- The two deck images show mutually exclusive spa alternatives. The primary sauna + massage chair recovery concept remains in the rear barn.
- Owner reports 220V at the deck. Circuit capacity, GFCI/disconnect, structural loads, water and drainage, setbacks and permits are all unverified.
- Do not install a filled hot tub, plunge or sauna on this deck without engineering / professional assessment. Deck size and spa geometry in the model are estimated.

Furniture placement ledger · 1 of 3

Steinway B + bench → Main lounge

6 ft 11 in × 4 ft 10 in case; about 9 × 6 ft player envelope. Professional move, floor capacity and humidity review.

Two cigar chairs + tufted bench → Main lounge

Conceptual upholstery proxies; confirm dimensions and circulation.

Mirrored / dark-wood art panel → Main lounge interior wall

Approx. 4 ft width placeholder; verify height, anchorage and heat separation.

Gray sectional with two chaises → Lower apartment living

11 × 6 ft placeholder; walk-out delivery route and modular sections unverified.

Furniture placement ledger · 2 of 3

Media console + 75-inch TV + soundbar → Lower apartment living

Concept placement; actual console width and outlet positions to measure.

Glass desk + Aeron → Clark’s upstairs office

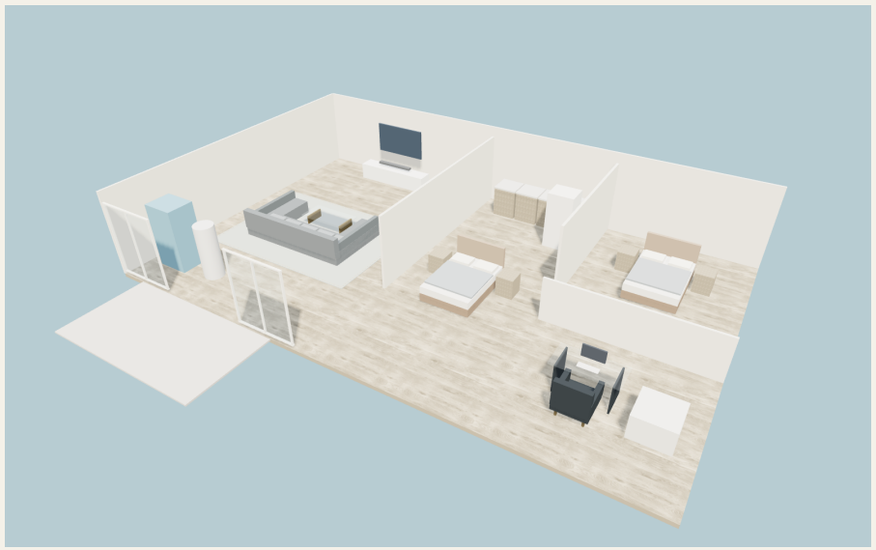
Aeron shown as ergonomic chair proxy, not a detailed branded model.

Children’s desk / chair / monitor → Lower guest bedroom

Room and furniture envelopes estimated.

Milan’s full bed + nightstand → Lower guest bedroom

Confirm mattress, headboard and moving-path sizes.



Furniture placement ledger · 3 of 3

Massage chair + cold plunge → Rear-barn recovery

Chair dimensions unrecorded; plunge approx. 66⅝ × 31½ in.

Peloton + EnergyFit rower/SkiErg → Rear-barn cardio wall

Existing gear from Florida inventory; clearances to measure.

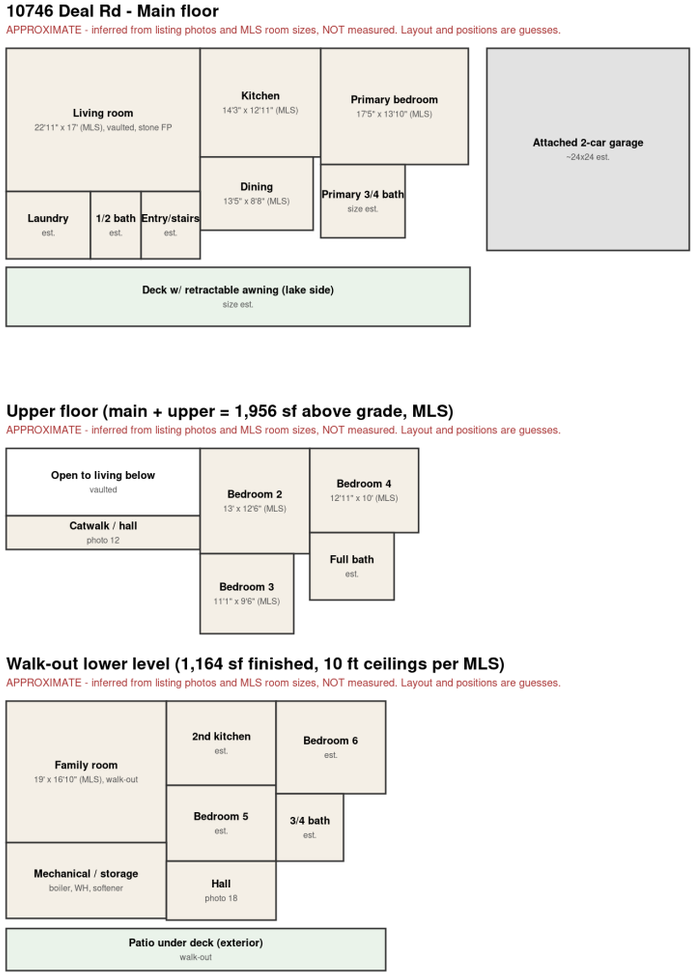
Three owned barbells / plates / DBs / KBs / mats → Rear-barn lifting + storage

Four-station rig, additional station bar and expanded storage are proposed, not all owned.

Treadmill / rack / benches / plyo boxes / fridge / bikes → Rear-barn gym

Retain where useful; sizes and complete original inventory not reverified. No claim that every object is an exact furniture match.

The photo-derived floorplan



This reference was reconstructed from listing photos and advertised room sizes. It is NOT an architectural floorplan; exact door, window, stair and partition locations remain unverified. The old two-car garage label is superseded by the seller sheet: 2.5-car.

Latest owner instructions override old room names:
Main: primary suite, piano lounge.
Upper left: Clark’s office.
Upper middle: Jenny’s full-room closet.
Upper other end: Jenny’s office.
Lower: sectional in apartment-style living room.
Front barn: vehicles.
Rear barn: CrossFit + sauna + massage chair.

Listing room sizes: lounge 22 ft 11 in × 17 ft; kitchen 14 ft 3 in × 12 ft 11 in; dining 13 ft 5 in × 8 ft 8 in; lower family 19 ft × 16 ft 10 in; primary 17 ft 5 in × 13 ft 10 in. These are listing-derived, not measured for this project.

Verification & safety checklist

• A measured architectural floorplan is not supplied. Existing plan is explicitly inferred from photos and listing room sizes. All wall, door, window, stair, building and site positions in the model are approximate, not a survey or construction drawing.

• Main lounge 22 ft 11 in × 17 ft; kitchen 14 ft 3 in × 12 ft 11 in; dining 13 ft 5 in × 8 ft 8 in; lower family 19 ft × 16 ft 10 in; primary 17 ft 5 in × 13 ft 10 in: listing-derived sizes, not field measurements. Whole-house geometry is a conceptual envelope and does not establish exact floor area.

• Seller-sheet statements, not independently inspected. Barn dimensions are unresolved: the sheet says both 30 × 40 ft; MLS says 30 × 40 ft plus 35 × 40 ft. The model follows the sheet at 30 × 40 ft each. Assigning the FRONT Airstream barn the 12 ft ceiling and REAR gym the 9 ft 6 in ceiling is an assumption to confirm. The 9 ft 6 in ceiling limits rope climbs and high overhead work; verify actual working clearances. The previously described furnace is likely the ducted wood stove heating system; its location (house or barn) remains unconfirmed. Exact measured dimensions, door geometry and setbacks remain unknown. Site layout is diagrammatic, not georeferenced.

• Wood foundation: specialist structural/moisture assessment, drainage and radon test. Confirm both barns are included within the split, title boundaries and shared-driveway rights.

Verification & safety checklist · continued

• The previously described furnace is likely the sheet’s ducted wood stove heating system; its location (house or barn) is unconfirmed. Do not assume it can heat a sauna. Its position is not positively visible in photo 30. Appliance suitability, combustion air, chimney, separation, clearances and CO protection require qualified review. Dedicated sauna heater shown.

• Gym insulation, conditioning, electrical capacity, ventilation, rig anchorage, overhead clearance, slab and wet-area drainage need professional review. No furnace heat connection is modeled.

• Quiet-road requirement remains unverified: no current MDOT AADT count or on-site noise study in this visualization. Garage clear width and piano moving path are also unverified.

Facts, intentions & what the model cannot prove

Current listing
https://www.brookwalsh.com/listing/1952304-10746-e-deal-road-williamsburg-mi-49690/

Read November 6, 2026 (EST). MLS 1952304 / Brook Walsh mirror. Advertised $699,000, 4.23 acres, 3,120 sq ft, six bedrooms / 3.5 baths in remarks. The structured bathroom fields and bedroom allocation conflict with remarks; fireplace flag also conflicts with the photographs / wood-burning description.

Visual references
All 37 retained listing photographs and the explicitly approximate, photo-derived floorplan. Barn-exterior attribution follows the owner’s stated front / rear use; the exact identity and geometry require a measured site visit. Image 30 establishes exposed framing, a concrete floor and stacked firewood, not a positive furnace location.

Owner instructions & existing household inventory
November 6 room uses, primary-suite location, vehicle distribution, barn sizes and doors, deck power and gym/recovery intent. Florida furniture and CrossFit equipment referenced from the Samels workup; original full inventory dimensions were not reverified. New additions are proposals.

Model limitations
Generic furniture and vehicle meshes, inferred site layout and floorplan. Not georeferenced. RE/MAX seller features sheet supplied November 7, 2026 is transcribed in full, with update years; its two 30 × 40 ft barns conflict with MLS and remain unresolved. No structural, zoning, legal apartment, HVAC, fire-safety, noise, parking-clearance or construction feasibility certification. No agent, township, utility or other third party was contacted.
